

Annal Catch-Quotas (2012~2013)

Prefecture and Type of Fishery		Catch-quota of each species									
		Dall's/dalli-type	Dall's/truei-type	P.white-sided d.	striped d.	Bottlenose d.	Spotted d.	Risso's d.	Short-finned p.w.	False killer w.	Total
Hokkaido/H.		1,192	83								1,275
Aomori/H.		8									8
Iwate/H.		5,726	6,611	154							12,491
Miyagi/H.		221	214								435
Chiba/H.					32						32
Shizuoka/DH				36	28	51	181			10	306
Wakayama	DH			134	450	604	400	270	161	70	2,089
	H.			36	100	68	70	226			500
Okinawa/H.						7			53	20	80
Total		7,147	6,908	360	610	730	651	496	214	100	17,216

H.= Harpooning d.=dolphin Dall's=Dall's porpoise, P.white-sided d.=Pacific white-sided dolphin, Short finned p.w.=Short finned pilot whale
 DH=Drive Hunt w.=whale

***Catch-quotas for Striped dolphins and Spotted dolphins:** Wakayama, the prefecture that has annual catches, continues to have the same quotas.

Chiba and Shizuoka, prefectures that have no catches, their quotas will be gradually reduced to reach zero in ten years after 2007, which means 2017. (This reconsideration and modification started in 2007, and in 2012, after five years, catch-quotas were again reconsidered and modified.)

***Catch-quotas for Dall's porpoise dalli-type allotted to Aomori & those for striped dolphins allotted to Chiba:** The quotas will be reduced gradually to reach zero in 2017. If dolphins are hunted by 2017, the quotas will be reconsidered.

***Catch-quotas for false killer whales and Pacific white-sided dolphins:** They are fixed and not changed until 2017.
